

Backend Developer or Engineer

We're expanding. Help us make an impression!

Adsata - a Halle (Saale) based biometric marketing startup - is looking for a tech savvy and startup hungry team member. We're in the seed stage 1 of our startup-phase, but have some exciting funding opportunities and a road map.

If you consider yourself a developer, want to be part of an international startup team, appreciate the opportunity to be a vital part of developing not just a product, but also the company around it, we should talk!

Job Type: 1-year initial contract with a chance to be a permanent part of the company
Full/Part-time (flexible)

Approximate Starting Date: 01.04.2019

What you bring to the table

- You built/worked with Web Apps and APIs
- You have experience in making your own projects reality
- You are willing to not just code, but take part in setting the course for our future direction
- You uncover new opportunities to improve how we serve our users and clients
- You assist with product development by bringing in innovative ideas

* Some knowledge of digital marketing is preferred but not required

Technical essentials

- API integrations through Python/JavaScript (e.g. Node.js)
- Familiarity with Django Rest Framework (DRF) will be a plus
- Some working knowledge of frontend JavaScript framework (React/Angular/Vue.js)
- Comfortable using AWS and aware of version control
- Some experience with frontend design preferred

What we offer

- Flexible working conditions (timing and location)
- Competitive pay and room for lots of growth
- Long-term opportunity within the company
- A chance to develop a platform from scratch
- A corporate culture that is not very corporate, waiting to be shaped by you
- A day off on your birthday & more
- Opportunity to attend industry events & conferences
